

FOR IMMEDIATE RELEASE

Accutrol, LLC Acquires Tek-Air Systems, Inc.

A close partnership becomes an integrated company.

Monroe, Connecticut, USA, January 15, 2015 – Accutrol, LLC today acquired Tek-Air Systems, Inc., a Danbury, Connecticut laboratory airflow control systems provider. “Tek-Air has long been a trusted strategic partner of ours,” stated Fred George, President of Accutrol, LLC. “The synergies of products and staff will significantly enhance our opportunities to serve our customers.” The two companies have shared a close relationship for many years and will combine their product lines to bring the best of each to the industry.

Accutrol will maintain headquarters in Monroe and operate manufacturing in both Monroe and Danbury. They will continue to provide innovative critical environment air flow solutions for spaces such as laboratories, life science and healthcare, and simultaneously modernize the Tek-Air product line.

About Accutrol, LLC – Accutrol is the manufacturer of the award-winning AccuValve® and other world class air flow measurement and control products. Their innovative technologies are used in critical environments and other specialized applications where the demands for 21st century sustainable airflow design is crucial.
