Accutrol Moves to Larger Facility

New Location Offers More Manufacturing Space and New Training Center

Danbury, Connecticut, USA, July 17, 2017 – Accutrol LLC has relocated to a larger facility located at 21 Commerce Drive in Danbury, CT. The new location offers a state-of-the-art manufacturing and training center. The move is in response to strong company growth throughout North America and worldwide. “Demand for our products has grown exponentially over the last several years. We are meeting that demand with a building that provides the foundational support we need for more efficient and larger-scale manufacturing as well as a new training center,” commented Accutrol’s president, Fred George.

Accutrol's new manufacturing and training facility at 21 Commerce Drive, Danbury, CT

The new Danbury headquarters is double the size of the previous building and offers clients a more convenient location for visits and product training. Accutrol will continue to develop, manufacture and provide innovative world-class air flow solutions for the marketplace in this new expanded facility.

About Accutrol, LLC – Accutrol is a manufacturer of world class air flow measurement and control products. Their innovative technologies are used in critical environments and other specialized applications where the demands for 21st century sustainable airflow design is crucial. Their flagship products include the AHR Innovation Award winning AccuValve® low pressure drop air flow control valve, the AHR Innovation Award winning AVC Fume Hood Control System and the VorTek^{G3} line of airflow measurement products.
